SONU KUMAR JHA

Lead Software Engineer | Backend Architect | Java, Spring Boot 3 & AI Agent Systems

Noida, India • +91 7546971006 • sjha9563@gmail.com • linkedin.com/in/sonu-jha-633765167 • github.com/Issonujha

EXECUTIVE SUMMARY

Strategic, metrics-driven **Lead Software Engineer & Architect** with 3.5+ years of industry experience engineering high-scale distributed backend microservices, fintech payment engines, autonomous AI agent platforms, and multi-tenant e-commerce ecosystems. Expert in **Java (17/21), Spring Boot 3.x, Microservices, Cloud Native (AWS/Docker/K8s), and Event-Driven Architecture**. Proven engineering leadership directing cross-functional squads of 6+ developers, standardizing PR reviews, optimizing p95 API latency by 45%, and architecting mission-critical integrations with ICICI Bank, Razorpay, Salesforce, and Odoo.

TECHNICAL EXPERTISE

Languages & Core:	**Java (8, 17, 21)**, TypeScript, JavaScript, SQL (PostgreSQL, MySQL), HTML5, CSS3
Backend & Microservices:	**Spring Boot 3.x**, Spring Cloud, Spring Security 6, Microservices Architecture, RESTful & GraphQL APIs, Hibernate, Spring Data JPA, Node.js
Distributed Systems & Caching:	**Apache Kafka**, RabbitMQ, **Redis** (Distributed Cache, Session Clustering, Rate-Limiting), Resilience4j (Circuit Breakers)
AI & Agentic Systems:	**Autonomous Agent Workflows (Claude Agent SDK)**, Isolated Docker Sandboxes, Automated Verification & Tool Calling
Cloud, DevOps & Containers:	**AWS** (EC2, S3, RDS, Lambda, CloudWatch), **Docker**, Kubernetes (K8s), CI/CD (GitHub Actions), Git, Maven
Fintech, Auth & Security:	**ICICI Bank QR & Payment APIs, Razorpay Gateway**, OAuth 2.0 / OIDC, JWT Authentication, Webhooks, RBAC
Testing & Observability:	JUnit 5, Mockito, Testcontainers, Postman, Prometheus, Grafana, OpenTelemetry, Distributed Tracing

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Kaptune Media India Pvt. Ltd. — **June 2026 – Present**

Noida, India (Internal transfer from Actolap Solutions Pvt. Ltd.)

- Direct technical roadmap, sprint planning, and architectural governance for a team of 6+ developers delivering enterprise B2B SaaS.
- Spearheaded transition of core services to **Java 17/21 and Spring Boot 3**, leveraging virtual threads and memory footprint tuning to increase throughput by 25%.
- Enforced automated CI/CD pipelines, strict code reviews, and test coverage standards, reducing production regression bugs by 30%.

Software Developer & Team Lead | Actolap Solutions India Pvt. Ltd. — **June 2023 – May 2026**

Noida, India

- Architected scalable backend microservices for **Trackwick** (Enterprise Field Operations Platform), sustaining high-volume daily transactions.
- Designed and launched the **ICICI Bank Dynamic QR Payment Gateway** with asynchronous webhook listeners and instant ledger reconciliation, achieving 99.9% uptime and zero duplicate transactions.
- Engineered bidirectional enterprise connectors for **Salesforce CRM, Zoho CRM, and Odoo ERP**, eliminating manual sync errors and saving 40+ operational hours/week.
- Configured multi-tier **Redis caching** and restructured complex MySQL queries with composite indexing, decreasing p95 API latency by **45%**.
- Implemented secure enterprise document and email pipelines via **Microsoft Graph API & OneDrive** with role-based access control (RBAC).
- Mentored junior developers on SOLID principles, clean architecture, and test-driven development (TDD) using JUnit 5 and Mockito.

Teaching Assistant (Internship) | Coding Ninjas — **August 2022 – December 2022**

Remote

- Mentored 200+ students in **Data Structures & Algorithms (DSA), OOP, and Java**; conducted 1,000+ live debugging sessions with a 95%+ satisfaction rating.

FLAGSHIP ARCHITECTURAL PROJECTS

Dukaandaar.in (RunningShop) — Multi-Tenant E-Commerce & Retail OS — Java 17, Spring Boot 3, Maven, Microservices, Razorpay, MySQL, Redis, React, React Native

Architected a distributed multi-vendor commerce platform with separated Spring Boot microservices (`auth-service`, `rn-backend`). Engineered an authoritative, deterministic order state machine enforcing strict sequences across payments, split-fulfillment, inventory lock, shipment, and refunds. Integrated **Razorpay payment gateway** with cryptographic webhook verification, multi-vendor commission splits, and automated catalog/stock synchronization.

SCA (Software Coding Agent) — Autonomous AI Engineering & Sandbox Bot — TypeScript, Docker Sandboxing, Claude Agent SDK, GitHub Apps API, Discord Bot, Linux VPS

Designed an autonomous AI coding agent platform that accepts natural language engineering tasks via Discord, spawns isolated Docker sandboxes, runs the Claude Agent SDK to diagnose and modify code across Spring Boot/React repositories, verifies builds in a secondary clean container, and opens validated GitHub Pull Requests with automated budget and credential governance.

Fintech QR Payment & Multi-Enterprise Integration Engine (Trackwick) — Spring Boot 3, ICICI Bank API, Salesforce REST, Odoo API, Zoho CRM, Webhooks, Redis

Built a resilient payment and enterprise hub with idempotent webhook consumers, rate-limiting adapters, and exponential retry queues for real-time customer and inventory reconciliation across external enterprise ecosystems.

EDUCATION & CREDENTIALS

Master of Computer Applications (MCA) – Galgotias University, Greater Noida — 2021 – 2023

Bachelor of Science (B.Sc.) – B. D. College, Patna — 2017 – 2020

Certifications: Java Web Development with Spring Boot & Microservices • Full-Stack Web Development Bootcamp | **Awards:** Recognized Team Lead at Actolap/Kaptune • Core PR Reviewer Award for Engineering Excellence
